SUMMARY

Computer Science graduate with hands-on experience in backend and full-stack development using Java, Spring Boot, Python, and Node.js. Skilled in REST APIs, databases, AWS, CI/CD, and AI-enabled applications including LLMs and RAG. Strong foundation in DSA, OOP, DBMS, system design, and scalable backend development.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Node.js, Express.js, FastAPI, REST APIs, Microservices, Kafka, JWT

Frontend: React, HTML, CSS, TypeScript

Databases: PostgreSQL, Redis, SQLite

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Linux

Tools & Concepts: Git, OpenAPI/Swagger, Unit Testing, Agile/Scrum, DSA, OOP, DBMS, System Design

AI / ML: LangChain, LangGraph, RAG, Ollama (LLMs), FAISS

Certifications: Artificial Intelligence Fundamentals - IBM SkillsBuild | AI Foundations - OpenAI

EXPERIENCE

Rakuten India

Student Trainee

Bengaluru, India

Jan 2026 - Apr 2026

- Developed full-stack applications with React, TypeScript, Node.js, Express.js, PostgreSQL, and TypeORM, implementing REST APIs, authentication, CRUD operations, and responsive interfaces.
- Built backend services with 20+ REST API endpoints across Users, Projects, Tasks, and Comments, using relational database design and ORM-based queries.
- Worked with AWS services (EC2, S3, Lambda, CloudWatch, VPC/IAM) and implemented cloud workflows including S3-triggered Lambda processing and EC2 automation.
- Implemented Docker/Podman containerization and GitHub Actions CI/CD, automating application builds and deployment workflows.
- Explored LLM-based applications and system design, building RAG and agent-based prototypes using FastAPI, embeddings, FAISS, and Notion APIs.

PROJECTS

URL Shortener Service | *Spring Boot, Java, PostgreSQL, Redis*

- Built a URL shortening service with unique short-code generation, URL validation, expiry handling, click tracking, and paginated URL management for efficient link handling.
- Used Redis caching to reduce database lookups and improve redirect performance, with Bucket4j rate limiting to prevent API abuse and ensure reliable service usage.

Personal Finance Tracker | *Node.js, Express, TypeScript, PostgreSQL, Redis*

- Developed 8 REST endpoints for user, transaction, and daily-summary management, with filtering, pagination, and CSV exports for efficient financial tracking.
- Used JWT authentication and rate limiting to secure APIs, Redis caching to reduce database lookups, and automated summaries for faster financial insights.

Multi-Model Evaluation Dashboard | *FastAPI, Ollama, Python, SQLite*

- Built a multi-LLM evaluation dashboard to compare model responses using latency, token usage, cost, and quality metrics for consistent performance analysis.
- Used LLM-as-a-Judge with a 1–5 evaluation rubric to automate response scoring and SQLite to persist evaluation results and history.

EDUCATION

Global Academy of Technology

Bachelor of Engineering in Computer Science (CGPA: 8.75/10)

Bengaluru, Karnataka

2022 - Jun 2026

LEADERSHIP & ACTIVITIES

Hack-a-League: Progressed from Volunteer (2024) to Coordinator (2025, 2026) for 24-hour offline hackathons, Dept. of CSE, Global Academy of Technology.

IET India Scholarship Award 2024: Organizing Committee Member, Regional Rounds (South 2).
